FREE Radon Test Kits Available

Radon is one of the most serious health hazards found in indoor air. It is a completely invisible, odorless and colorless gas!

FACTS:

- This gas is the second leading cause of lung cancer
- It is responsible for up to 30,000 lung cancer deaths each year
- Testing has shown that in some areas 30% of homes have elevated radon levels in Southwest Wisconsin.
- Making repairs to eliminate radon can be simple and affordable, typically less than \$1,500.

Testing is the only way to know what the radon level is in your home. Test kits are available free of charge (while supply last) at the
